**Recommendation:** If you're new to AI trading, consider depositing the minimum \$250 initially. This lets you test the waters without risking a large sum.

Once you complete registration and KYC verification (which can take 24-48 hours), you can deposit funds and begin trading. Demo mode is accessible immediately after account creation.

**Step 4 – Begin real-time trading:** The final step is beginning real-time trading on the Trading Bot website. The system will offer you assistance and data that can provide you with trading support in each step of the process. Trading Bot also provides you access to a demo trading account that allows you to trade on the platform without using the capital that you have used for a short time before you begin actual trading.

Lending laws vary by jurisdiction, and not all services described in this article may be available in every state or region. It is the responsibility of the reader to understand and comply with local laws and regulations. The platforms mentioned are independently operated and are not controlled or endorsed by the publisher.

People have free access to Trading Bot. They can access it in the demo and live version without paying a cent. They just need to invest capital to earn from it. However, there are no other costs. The company withholds nothing from the investment or income, so they don't lose their investment.

**Final Recommendation:** For traders seeking a diversified, AI-assisted approach to multiple financial markets, Trading Bot

is a solid choice-provided you understand the inherent risks, practice in demo mode first, and apply disciplined risk management. Always start with a conservative deposit (e.g., \$250), monitor performance regularly, and remain prepared to adjust AI settings as market dynamics evolve.

Limited Transparency on Algorithmic Details: Users do not have direct access to the AI's source code, making it difficult to fully audit risk controls.
