Once the flow of the software is established, people can invest any amount in it to open a trade. There is no limit to the amount they can invest in this platform, but they need a minimum of \$ 250 to start trading. The money invested stays with the trader and can be withdrawn whenever they want. No money is deducted from the income. Get the full percentage of the income without any hidden deductions. So, people can sit back and relax by watching their account make more money. This app will do all the work, saving one the hassle of investing.

Futures transactions involve high risk. The amount of the

initial margin is low compared to the value of the futures contract, so that transactions are “leveraged” or “geared”. A relatively small market movement has a proportionately larger impact on the funds that you have deposited or have to pay: this can work both for you and against you. You may experience the total loss of the initial margin funds as well as any additional funds deposited in the system. If the market develops in a way that is contrary to your position or if margins are increased, you may be asked to pay significant additional funds at short notice to maintain your position. In this case it may also happen that your broker account is in the red and you thus have to make payments beyond the initial investment.

Rationale: AI scans can sometimes lag behind breaking news. Being aware of looming catalysts allows you to temporarily pause automated trading or switch to manual mode to avoid whipsaw losses.

Before you begin carrying out transactions with an electronic system, you should carefully review the rules and provisions of the stock exchange offering the system, or of the financial instruments listed that you intend to trade, as well as your broker's conditions. Online trading has inherent risks due to system responses/reaction times and access times that may vary due to market conditions, system performance and other factors, and on which you have no influence. You should be aware of these additional risks in electronic trading before you carry out investment transactions.
